Dear Prof Metcalf:

The following notes complete all that I can do in the further identification of your collections of 1924

- Nos. 1 and 228 are *Symplocos caudata* Wall., not *urceolaris*.
- " 5 and 16 *Prunus japonica* var. *fokienensis* Rehder.
- " 37 *Rosa gentiliana* Lev. & Van.
- " 47 *Symplocos* near *anomala* Brand. but branches glabrous need flowering material.
- 6 *Crataegus cuneata* var. or n.sp.? Very likely undescribed, more material needed, especially with flowers.
- 273 is *Arundinella nepalensis* Trin.
- 60 *Arundinella* sp., doesn't agree with any of the described species, perhaps a n.sp., but more ample material desired.
- 248 *Sycopsis*? this is a guess only, as there are neither flowers nor fruits. I sent a part of it to Mr. Rehder and he states that it is different from all the hamamelidaceous material in the Arnold Arboretum. I wish that you would make a special effort to get this with flowers and fruits, and send me several specimens. Very likely undescribed.

Have greatly enjoyed working with your material and hope that you will find the time to make more extensive collections, and whenever possible supply notes

Very truly yours

Ed Merrill

oOo

Identifications as to names follow the International Code. Where names are used differing from those in Forbes & Hemsley, etc., the synonym has usually been added.

No. 60 is the same as No. 324 and is probably undescribed. I sent a specimen to Hitchcock and he states that more mature material is desired, the spikelets being very young. As you know the place in which it grows please watch it and collect ample material when the plant is fully mature. I would like to have several specimens if possible so that it it does prove to be new I can place cotypes in several of the larger herbaria of Europe and America.

OK to 400
OK to 409

Handwritten text in a cursive script, likely a historical document or manuscript. The text is written in dark ink on a light-colored, aged paper. The script is dense and fills most of the page, with some lines being more prominent than others. The handwriting is characteristic of a historical cursive style, possibly from the 17th or 18th century. The text is arranged in several paragraphs, with some lines starting with capital letters. The overall appearance is that of a well-preserved but aged historical document.

E.P. Metcalf, additions

- 494 *Viburnum luzonicum* Rolfe Caprif.
356 *Elaeocarpus chinensis* Hook.f. Elaeoc.
80 *Salix dunni* Schneider ? fls. needed.

2 # 5

 871 *Marattia* caesp., juvenile, sterile, prob. *Marattia*
 872 sterile, *Pilea* sp. Urt.
 873 *Liquidambar*, apparently undescribed. Wish that you would try to get it again with mature fruits. Note the smaller leaves with entire margins, as compared with *L. formosana*
 874 *Adiantum diaphanum* Bl. Poly
 875 *Veronica andersonii* Benth. Comp.
 876 *Psychotria serpens* L. Rub.
 877 *Liquidambar formosana* Hance Hamamel
 878 *Lilium* sp., group of *grandiflorum* Thb. Sterile
 879 *Odontosoria chinensis* J.Sm. Poly
 880 *Asarum caudigerum* Hance Arist.

- 885 Polypodium hastatum Thunb. Poly
 87 Dioscorea sp. juvenile, sterile Diosc.
 87 Polypodium lineare Thunb. Poly
 882 Athyrium japonicum (Thunb.) Poly
 9 sterile, indet., juvenile. Prob. Umbellifer.
 93 Polypodium ellipticum Thunb. Poly
 94 Rhamnus leptorhynchus Schneider. Rhamn
 96 Sedum. Crass.
 97 Alseodaphne japonica Mez Myrsin
 99 Arenga tremula (Blanco) Becc. Palm., i.e., so far as I can tell from the fragment of a leaf. If so, then planted, and introduced from Manila where it is cultivated for ornamental purposes. Native of the Philippines. It will be a very great aid if cultivated plants can be so indicated on the labels.
 900 Smilax sp. sterile. Lil.
 Missing numbers not supplied. Berkeley, California, Aug. 15, 1925 ETC

100

L#7

901 apparently *Erioseporum* (Cern.), but might be *Asclepi adnosa*
no fls or fruits

902 *Peperomia diindygulensis* Miq. Piper.

903 *Carex doniana* Spreng. Cyp.

904 *Photinia serrulata* Lindl. Rosa.

905 *Asplenium* would like another specimen if possible

906 *Psilotum nudum* Griseb. Psilotaceae

907 *Rhododendron ovatum* Pl. Eric.

908 *Araceae* indet. sterile. Perhaps *Typhonium*

909 *Coclogyne* (sterile) Orch. fls necessary always in orchids

910 ~~*Orchid*~~ ~~*suggests Eria*~~ no specimen

911 no specimen

912 *Orchid* suggests *Eria*. sterile indet.

913 *Carex*, fruits fallen.

914 no specimen

915 *Odontosoria cainensis* J.Sm. A fern. No number on the sheet

916 *Lindsaya orbiculata* Mett. Poly.

917 *Adiantum flabellulatum* L. Poly

918 *Athyrium lanceum* Milde Poly.

919 *Selaginella savatieri* Baker

920 no specimen

921 *Scutellaria rivularis* Wall. Lab.

922 *Lygala japonica* Houtt. Polygal

923 no specimen

924 *Pteris serrulata* Linn.f. Poly

925 *Viola japonica* Langsd.

926 *Diospyros kaki* Linn. Eben

927 *Fragaria indica* Focke Rosa

928 *Serissa foetida* Comm. Rub.

929 *Selaginella*, sterile, indet

930 *Citrus maxima* (Burn.) Merr. (*C. grandis*, *C. ducamana*) Rut.

931 *Sedum frymarioides* Hance Grass.

932 no specimen

933 *Oxalis martiana* Zucc. Oxal

934 *Magnolia grandiflora* Linn. Magnol

935 *Lycium chinense* Mill. Sol.

936 *Indigofera suffruticosa* Mill. (*I. anil*) Leg.

937 *Agropyron caninum* Linn. Gram.

938 *Briza minor* Linn. Gram OK. 2.8.44.

939 *Microtis unifolia* Reichb.f. Orch.

oOo Berkeley, Sept. 3, 1925

EDM

✓ 1001 *Ischaemum ciliare* Retz
 (not Aristatum)

#58

Metcalf and Chang,
corrections and additions

- 168 *Aralia chinensis* Linn. not *dasyphylla* Miq.
857 *Viola diffusa* Ging var. *glaberrima* W. Becker
610 *Viola alata* Buergers.
644 *Viola philippica* Cav. subsp. *malesica* W^hBeckr. same as No. 20
not *patrinii*
804 *Viola fukiensis* W. Becker n.sp.
747 *Viola hupeiana* W^hBecker
565 ✓ Rehder determinesthis as *Desmodium gyroides* DC. but I feel that
it is nearer *heterocarpum* DC. Fruits needed
614 *Rubus corchorifolius* Linn.
603 *Spiraea*. Rehder thinks this may be a new species. More
ample material desired.
800 *Castanopsis concinna* DC. rather than *C. hystrix* DC.

EDM. Oct. 15, 1925

Metcalf--China--Sept. 23, 1927.

Fukien Plants Submitted By

F. P. Metcalf

- 1001 *Rosa laevigata* Mx. Rosa
 2 *Wikstroemia stenantha* Hance Thym
 3 *Buddleia lindleyana* Fortune Log.
 4 *Lussaenda pubescens* Ait. Rub.
 5 *Rhodomyrtus tomentosa* Hassk. Myrt.
 6 *Symplocos paniculata* Wall. Symp. mixed with *Millettia*
 reticulata Benth. (flowering) *paniculata* coll
 7 *Lysimachia clethroides* Duby Prim
 8 *Clerodendron cyrtophyllum* Turcz. Verb.
 9 *Blechnum orientale* Linn. Poly.
 1010 *Andropogon micranthus* Kth. Gram.
 11 *Setaria geniculata* Beauv. Gram
 12 *Agropyron* too old, spikelets all fallen. Gram
 13 *Satureia chinensis* Briq. Lab.
 14 *Vitex negundo* L. Verb.
 15 *Melilotus parviflora* Desf. Leg.
 16 *Melothria heterophylla* Cogn. Cucurb.
 17 *Miscanthus sinensis* Anders. Gram
 18 *Dianella ensifolia* DC. Lil.
 19 *Melastoma normale* Don Melast
 1020 *Artemisia* ? Comp. ?
 21 *Cyperus iria* L. Cyp.
 23 *Aster striatus* Champ. Comp.
 24 *Hypericum japonicum* Thunb.
 22 *Panicum crusgalli* L. Gram
 25 *Ancilema malabaricum* (L.) Merr. Commelin
 26 *Aeschynomene indica* L. Leg.
 27 *Eclipta alba* Hassk. Comp.
 28 *Adina pilulifera* Fr. Rub.
 29 *Sloanea hongkongensis* Hamsl. Elaeoc
 1030 *Eugenia microphylla* Abel
 31 *Callicarpa formosana* Rolfe Verb.
 32 *Mallotus philippensis* Muell. Euph.
 34 *Ficus beechyana* H. & A. Mor.
 35 *Millettia reticulata* Benth. Leg.
 36 *Crataegus* = 96, fls. needed. *Rosa cuneata* B. & Z. var 1 see list # 23
 37 *Glochidion puberum* Hutch. Euph
 38 *Ardisia crispa* A. DC. Myrsin.
 39 *Rosa microcarpa* Lindl. Rosa
 1040 *Eugenia microphylla* Abel. Myrt. (This is exceedingly variable
 in leaf form.)
 41 *Symplocos chinensis* Desv. or *paniculata* Wall. Symp.
 42 *Cocculus trilobus* DC. Menisp
 43 *Fimbristylis complanata* Link Cyp.
 44 *Dammacanthus indicus* Gaertn. Rub.
 45 *Columella japonica* (Thunb.) Merr. Vit.
 46 *Lussaenda pubescens* Ait. Rub.
 47 *Buddleia ~~axiatia~~ lindleyana* Fortyne Log
 48 *Artemisia anomala* Moore Comp.
 49 *Lysimachia clethroides* Duby. Prim
 1050 *Calamagrostis epigejos* Roth. Gram
 51 *Polypodium hastatum* Thunb. Poly.
 52 *Houttuynia cordata* Thunb. Saur.
 53 *Symplocos paniculata* Wall. Symp
 54 *Dryopteris erythrosora* O. Ktze. Poly.
 55 *Adinandra* ? 6 1421 Thea ??
 56 *Athyrium lanceum* Milde Poly

1100 *Echinochloa crusgalli* (L.) Beauv.

- 1057 *Lysinachia clethroides* Duby. Prim.
- ~~58~~ *Vaccinium carlesii* Dunn. Eric.
- ~~59~~ *Woodwardia japonica* Sw. Poly.
- ~~60~~ *Eugenia microphylla* Abel. Myrt.
- ~~1101~~ *Vaccinium carlesii* Dunn. ^{check} Eric.
- 02 *Paederia tomentosa* Bl. Rub.
- ~~03~~ *Eurya japonica* Thunb. Thea.
- ~~04~~ *Glochidion puberum* (L) Hutch Euph.
- 05 *Adisia crispa* DC. ^{Myrsine} Myrsin
- ~~06~~ *Symplocos chinensis* (Lour) Desv. Symplocos
- 07 *Hypericum attenuatum* Choisy Gutt.
- ~~08~~ *Athyrium lanceum* Milde Poly.
- ~~09~~ *Ficus formosana* Max Mor.
- 00 *Panicum stagnium* Retz. ^{Gram} Gram
- 10 *Rhamnus hupehensis* Schneiders or *wilsonii* Schneiders Rham.
- 11 *Symplocos anomala* Brand Symple.
- ~~12~~ *Symplocos caudata* Wall Symple.
- ~~13~~ *Thea drupifera* (Lour) Pierre. Thea.
- 14 *Enagrostis ferruginea* (Thb.) Beauv. Gram.
- 15 *Dryopteris sparsa* Oakes Poly.
- ~~17~~ *Fimbristylis schoenoides* Vahl. Cyh.
- ^{Sagittaria} 18 *Sagittifolia* L. var. Alism.
- ~~19~~ *Polygonum flaccidum* Meisn. Polygon.
- ~~20~~ *Satureia confinis* (Hance) Lab.
- 21 *Columella japonica* (Thunb) ^{Utricularia} Utricularia. Vitis.
- ~~22~~ *Lobelia chinensis* Lour. Campan.
- ~~23~~ *Glochidion puberum* (L) Hutch Euph.
- 24 *Rubus parvifolius* Rosa.
- ~~25~~ *Gahnia tristis* Nees Cyh.

Crataegus cuneata G. Z. var. ^{reputed #1101 - see list 28}

Please excuse the
absence of
sheets - I tried an
unfruitful search &
came up with a
load for
you

- 1007 *Lychnis elaeagnifolia* Druy. Prim.
- 1008 *Vaccinium carlesii* Dunn. Eric.
- 1009 *Andropogon japonicus* Sw. Poly.
- 1010 *Eugenia microphylla* Adel. Myrt.
- 1011 *Vaccinium carlesii* Dunn. Eric.
- 1012 *Paederia tomentosa* Bl. Rub.
- 1013 *Eurya japonica* Thunb. Thea.
- 1014 *Glochidion puberum* (L.) Hutch. Rubr.
- 1015 *Adiantum crispum* Ait. Polyp.
- 1016 *Symplocos chinensis* (L.) DC. Symp.
- 1017 *Hypericum attenuatum* Choisy. Gutt.
- 1018 *Athyrium lanceum* Willd. Poly.
- 1019 *Ficus formosana* Max. Mor.
- 1020 *Panicum stagnatum* Retz. Gram.
- 1021 *Pharus hupensis* Schreb. or Wilsonii Schreb. Gram.
- 1022 *Symplocos anomala* Brand. Symp.
- 1023 *Symplocos cuneata* Wall. Symp.
- 1024 *Thea drupifera* (Lour.) Pierre. Thea.
- 1025 *Pharus ferrugineus* (Thunb.) Beauv. Gram.
- 1026 *Dryopteris sparsa* Oakes. Poly.
- 1027 *Pinellia sparsa* Vahl. Cyn.
- 1028 *Sagittaria* L. var. *Alisma*.
- 1029 *Polygonum filicinum* Moench. Polygon.
- 1030 *Satureia confinis* (Hance) Lab. Lab.
- 1031 *Colymbella japonica* (Thunb.) Horn. Vit.
- 1032 *Lobelia chinensis* Lour. Campan.
- 1033 *Glochidion puberum* (L.) Hutch. Rubr.
- 1034 *Indus parvifolia* Ros. Ros.
- 1035 *Gahnia tristis* Nees. Cyn.

These are the same as the ones in the previous list.

1126 Fimbristylis complanata ^{Link} ~~Link?~~ Cyb.

27 Commelina communis ^{L.} Commel.

28 Loropetalum ^{chinense R.Br.} ~~chinense~~ Rosn. Hamam.

~~29~~ Rosa bracteata Wendl Rosa.

~~30~~ Scleria radula Hance Cyb.

31 Millettia ^(cf. nitida Benth) Leg.

~~32~~ Ficus formosana Max Mor.

33 Asparagus cochinchinensis ^{inensis} (Lour) Merr Lil

~~34~~ Buddleia lindleyana Fortune Log.

~~35~~ Polygonum cuspidatum ^{S & Z} Polygon.

36 Eleocharis Cyb.

~~37~~ Fimbristyles ^{mu} complanata Link Cyb.

38 Stranvaesia benthiana ^{men} ~~or~~ Photinia ⁿⁱ lucida ~~(Hance) Merr.~~ Rosa

~~39~~ Ficus foveolata Wall Mor.

~~40~~ Eragrostis zeylanica Nees Gram.

~~41~~ Brunella vulgaris L. Lab.

~~42~~ Aster trinervius Roxb Comp.

43 Odontosoria chinensis ^{J. Sm.} ~~Her.~~ Poly.

44 Dryopteris erythrosora ^{O. Kt.} ~~ect.~~ Poly.

46 Dryopteris parasitica ^{O. Kt.} ~~juvenile?~~ Poly.

47 Melastoma dodecandrum Lour Melast.

~~48~~ Phyllostachys puberula ^{Munro} ~~Lame.~~ Gram.

~~49~~ Polystichum amabile Sm. Poly.

54 Polypodium normale Don. Poly.

55 Polystichum falcatum Diels Poly.

57 Nymphaea? ^(cf. Limnanthemum?) Nymph.

58 Arundinaria ~~inf.~~ ^{abnormal} Gram. abnormal inflorescence

59 Selaginella Sel.

~~60~~ Acorus gramineus ^{lit.} ~~lit?~~ Arac.

Kit

1. The first thing I noticed when I stepped out of the plane was the cold air. It was a sharp contrast to the warm cabin.

2. I looked down at the snow-covered ground and felt a sense of awe. The landscape was so beautiful and serene.

3. The snow was so deep that it looked like a white blanket covering the entire world. The trees were covered in snow, and the ground was a solid white.

4. I took a deep breath and felt the cold air fill my lungs. It was a refreshing experience, and I felt like I was starting a new journey.

5. The snow was so soft that it felt like walking on a giant's foot. I took a few steps and felt the snow crunch under my feet.

6. The snow was so pure that it looked like a giant's foot. I took a few steps and felt the snow crunch under my feet.

7. The snow was so soft that it felt like walking on a giant's foot. I took a few steps and felt the snow crunch under my feet.

8. The snow was so pure that it looked like a giant's foot. I took a few steps and felt the snow crunch under my feet.

9. The snow was so soft that it felt like walking on a giant's foot. I took a few steps and felt the snow crunch under my feet.

10. The snow was so pure that it looked like a giant's foot. I took a few steps and felt the snow crunch under my feet.

11. The snow was so soft that it felt like walking on a giant's foot. I took a few steps and felt the snow crunch under my feet.

12. The snow was so pure that it looked like a giant's foot. I took a few steps and felt the snow crunch under my feet.

13. The snow was so soft that it felt like walking on a giant's foot. I took a few steps and felt the snow crunch under my feet.

14. The snow was so pure that it looked like a giant's foot. I took a few steps and felt the snow crunch under my feet.

15. The snow was so soft that it felt like walking on a giant's foot. I took a few steps and felt the snow crunch under my feet.

 4 *Dodonaea viscosa* Jacq. Sapind.
 5 *Paliurus ramosissimus* Poir. Rham.
 6 *Gerbera?* no fls. Comp.
 7 *Vaccinium carlesii* Dunn. Eric.
 8 *Columella japonica* Merr. Vit.
 9 *Apluda mutica* L. Gram.
 2110 *Monochasma*--no fls. or fruits. Scroph.
 11 *Cyperus iria* L. Cyp.
 12 *Cocculus trilobus* (Thb.) DC. Menisp.
 13 *Artemisia vulgaris* L. var? Comp.
 14 *Rhodomyrtus timentosa* (Ait.) Myrt.
 15 *Ampelopsis heterophylla* Pl. Vit.
 16 *Eugenia microphylla* Abel. and *Vaccinium carlesii* Dunn.
 17 *Abutilon avicennae* Gaertn. Malv.
 18 *Celosia argentea* L. Amarant.
 19 *Polygonum plebeium* R.Br. Polygon.
 2119a *Juncus prismatocarpus* R.Br. = 15682

Fukien 8

- 2120 *Panicum repens* L. Gram.
- 21 *Cocculus trilobus* (Thb.) DC. Menisp.
- ~~22~~ *Drosera burmanni* Vahl. Dros.
- 23 *Blumea sericans* Hk.F. Comp.
- 24 *Paspalum scrobiculatum* L. Gram.
- 25 *Panicum "frumentaceum"* Roxb. Gram.
- ~~26~~ *Rhynchospora rubra* Makino Cyp.
- ~~27~~ *Polygonum minus* Huds? Polygon.
- 28 *Monochoria vaginalis* Presl. Pont.
- 29 *Celosia argentea* L. Amarant.
- 2130 *Setaria geniculata* Beauv. Gram.
- 31 *Andropogon aciculatus* Retz. Gram.
- ~~32~~ *Aster fordii* Hemsl. (cf. *striatus* Champ.) Comp.
- ~~33~~ *Grewia glabrescens* Benth. Til.
- 34 *Wahlenbergia gracilis* DC. Campan.
- 35 *Hydrocotyle* Umb.
- 36 *Desmodium triquetrum* DC. Leg.
- 37 *Hydrangea hortensia* Sax.
- ~~38~~ *Clerodendron cyrtophyllum* Turcz. Verb.
- ~~39~~ *Burmannia distichia* L. Burm.
- 2140 *Scleria harlandii* Hance probably- Cyp.
- 41 *Eriocaulon australe* R.Br. Erioc.
- ~~42~~ *Rhynchospora glauca* Vahl. Cyp.
- 43 *Bulbophyllum* (sterile indet.) Cyp.
- 44 *Fimbristylis nutans* Vahl. Cyp.
- ~~45~~ *Mussaenda pubescens* Ait? Rub.
- 46 *Ficus beechyana* H & A. Mor.
- 47 *Hypericum japonicum* Thunb. Gutt.
- 48 *Ficus hirta* Vahl. Mor.
- 2150 *Calamagrostis epigejos* Roth. Gram.
- 51 *Mussaenda pubescens* Ait. Rub.
- 52 *Ficus variolosa* Lindl. Mor.
- 53 *Morinda umbellata* L. Rub.
- 54 *Millettia?* sterile Leg.
- 55 *Zanthoxylum avicennae* DC. Rut.
- ~~56~~ *Paspalum scrobiculatum* L. Gram.
- 57 *Gahnia tristis* Nees. Cyp.
- ~~58~~ *Lepidosperma chinense* Nees. Cyp.
- 59 *Ficus beechyana* H. & A. Mor.
- 2160 *Millettia reticulata* Benth. Leg.
- 61 *Fortunella japonica* (Thb.) Swingle Rut.
- ~~62~~ *Rhynchospora glauca* Vahl. Cyp.
- ~~63~~ *Eurya japonica* Thunb. Thea.
- 64 *Scleria* (inadequate) Cyp.
- 65 *Smilax china* L? fla. needed Lil.
- 66 *Aneilema spiratum* R. Br. Commel.
- ~~67~~ *Mallotus apelta* Muell. Euph.
- ~~68~~ *Polygonum pedunculare* Wall. Polygon.
- ~~69~~ *Scutellaria indica* L. Lab.

- ~~2170~~ *Teucrium japonicum* Willd. -959 Lab.
~~71~~ *Erigeron linifolius* Willd. Comp.
~~72~~ *Fimbristylis alliacea* Vahl. Cyp.
~~73~~ *Panicum frumentaceum* Roxb. Gram.
~~74~~ *Leptochloa filiformis* R. & S. Gram.
~~75~~ *Stephania japonica* Miers. probably- Menisp.
~~76~~ Sterile (juvenile indet.)
~~77~~ *Cheilanthes fordii* Baker? Poly.
~~78~~ *Hypericum japonicum* Thunb. Gutt.
~~79~~ *Urena lobata* L. Malv.
2180 *Pycnus odoratus* Urb. Cyp.
~~81~~ *Trapa natans* L.
~~82~~ *Limnanthemum indicum* Thw? Gent.
~~83~~ *Cephalanthus occidentalis* L. Rub.
~~84~~ *Paederia foetida* L. sensu lat. Rub.
~~85~~ *Pouzolzia zeylanica* (L) Benn. Urt.
~~86a~~ *Panicum crusgalli* L. var. Gram.
~~86b~~ *Saccharum spontaneum* L. Gram.
~~87~~ *Panicum crusgalli* L. var. Gram.
~~88~~ *Ixora chinensis* Lam. Rub.
~~89~~ *Ficus formosana* Max. Mor.
2190 *Scutellaria* prob. *rivularis* Wall. too old. Lab.
~~91~~ *Alternanthera sessilis* R. Br. Amarant.
~~92~~ *Desmodium heterophyllum* Dc. Leg.
~~93~~ *Potamogeton* Potam. More ample material desired and especially good fruiting specimens.
~~94~~ Probably *Bacopa monniera* Wettst sterile. Scroph.
~~95~~ *Bulbostylis barbata* Kth. Cyp.
~~96~~ *Euphorbia hirta* L. Euph.
~~97~~ *Anellema* prob. *spiratum* R.Br. Commel.
~~99~~ *Mallotus philippensis* Lam. Euph. *Mallotus*
2200 *Ardisia Myrsin.* (Looks interesting i.e. unknown to me and maybe undescribed. Nothing can be done with it in the absence of complete flowers. (corollas fallen).
~~2201~~ *Photinia variabilis* Hemsl. Rosa.
2 *Ficus formosana* Maxim Mor.
3 *Ficus* - perhaps *beechyana* H. & A. too young. Mor.
4 *Urena lobata* L. Malv.
~~5~~ *Hygrophila salicifolia* Nees. Acant.
~~6~~ *Hydrocotyle sibthorpioides* Lam. Umb.
~~7~~ *Wedelia chinensis* (Osbeck) Merr. Comp.
8 *Ottelia alismoides* Pers? too scanty. Hydroch.
9 *Panicum crusgalli* L. var. "muticum" Gram.
~~2210~~ *Rub.* *... ..*
11 *Hoya* sterile Ascl.
12 *Athyrium* -- please send another specimen. Poly.
13 *Cyclophorus lingua* (Thunb.) sterile Poly.
14 *Setaria palmaefolia* Stapf. sterile Gram.
~~15~~ *Psychotria reevesii* Wall. Rub.
~~16~~ *Oreocharis benthami* Clarke Gesn.
~~17~~ *Pteris semipinnata* L. Poly.
~~18~~ *Asplenium laserpitiifolium* Lam. Poly.
~~19~~ *Leucocryum*? Musci.

- 2220 *Marchantia?* Hep.
 21 *Musci.* ~~maet~~
 22 *Adiantum diaphanum* Bl. Poly.
 23 *Melastoma normale* Don. Melast.
 24 *Vitex trifolia* L. var. *ovata* Makino. Verb.
 25 *Satureia chinensis* Briq? Lab.
 26 *Eragrostis geniculata* Nees? Gram.
 27 *Zornia diphylla* Pers. Leg.
 28 *Pueraria phaseoloides* Benth. Leg.
 29 *Oxalis repens* Thunb. Ox.
 2230 *Eragrostis geniculata* Nees? Gram.
 31 *Fimbristylis* - possibly *eragrostis* Hance. Cyp.
 32 Juvenile. indet. No fls. or fruit.
 33 *Datura metel* L. Sol.
 34 *Breynia officinalis* Hemsl? Euph.
 35 *Glochidion sterile*. Euph.
 36 *Symplocos crataegoides* Ham. Symp.
 37 *Elephantopus scaber* L. probably; too scanty. Comp.
 38 *Isachne globosa* (Thunb.) R.Br. Gram.
 39 *Fimbristylis*- too scanty. Cyp.
 2240 *Fimbristylis eragrostis* Hance Cyp.
 41 *Vernonia cinerea* Less. Comp.
 42 *Paspalum scrobiculatum* L. Gram.
 43 *Fimbristylis acuminata* Vahl. Cyp.
 44 *Philydram lanuginosum* Banks? juvenile Philydr.
 45 *Eurya japonica* Thunb. Thea.
 46 *Anodendron laeve* (Champ) Maxim Apoc.
 47 *Stephania japonica* Miers. Menisp.
 48 *Eugenia microphylla* Abel. Myrt.
 49 *Zizania latifolia* Trin. Gram.
 2251 *Eragrostis* too old. Gram.
 52 *Ficus variolosa* Lindl. Mor.
 53 *Ficus foveolata* Wall. juvenile Mor.
 54 *Cibotium barametz* J. Sm. Cyath.
 55 *Dryopteris simplex* O. Ktz. Poly.
 56 *Citrullus vulgaris* Ser. Cucurb.
 57a *Athyrium*- please send another specimen. Poly.
 57 *Tectaria* (*Aspidium*) *subtriphyllum* (H.&K.) Poly.
 58 *Momordica charantia* L. Cucurb.
 59 *Nandina domestica* Thunb. Berb.
 2260 *Psychotria reevesii* Wall. Rub.
 62 *Styrax faberi* Perk. Styr.
 63 *Millettia reticulata* Benth. Leg.
 64 *Platycodon grandiflorus* A.DC. Campan.
 66 *Buddleia lindleyana* Fortune Log.
 67 *Ardisia quinqueгона* Bl. Myrsin.
 68 *Belamcanda chinensis* (L) Irid.
 69 *Rosa gentiliana* Lev. & Van. Rosa.

 49 *Paederia tomentosa* Bl. Rub.
 2550 *Aster trinervis*. Roxb. Comp.

I can't name mosses, lichens, fungi, helottiae
 etc. If however you will send ample spec-
 imens in three groups with duplicate
 labels I will try through specialists.

If the specimens had been more ample I
 probably would have done better in some
 cases — at any rate I would have been
 able to divide them & send to specialists
 in certain groups. It is always a good idea
 to make the identification set particularly
 ample, so that there will be plenty of
 material for the necessary dissection, and
 where necessary, to divide for specialists.

E. M.

Memorandum for
the President

1. The Department of the Interior has the honor to acknowledge the receipt of your letter of the 10th inst. in relation to the proposed extension of the public lands reservation at the mouth of the Colorado River, California.

2. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

3. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

4. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

5. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

6. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

7. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

8. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

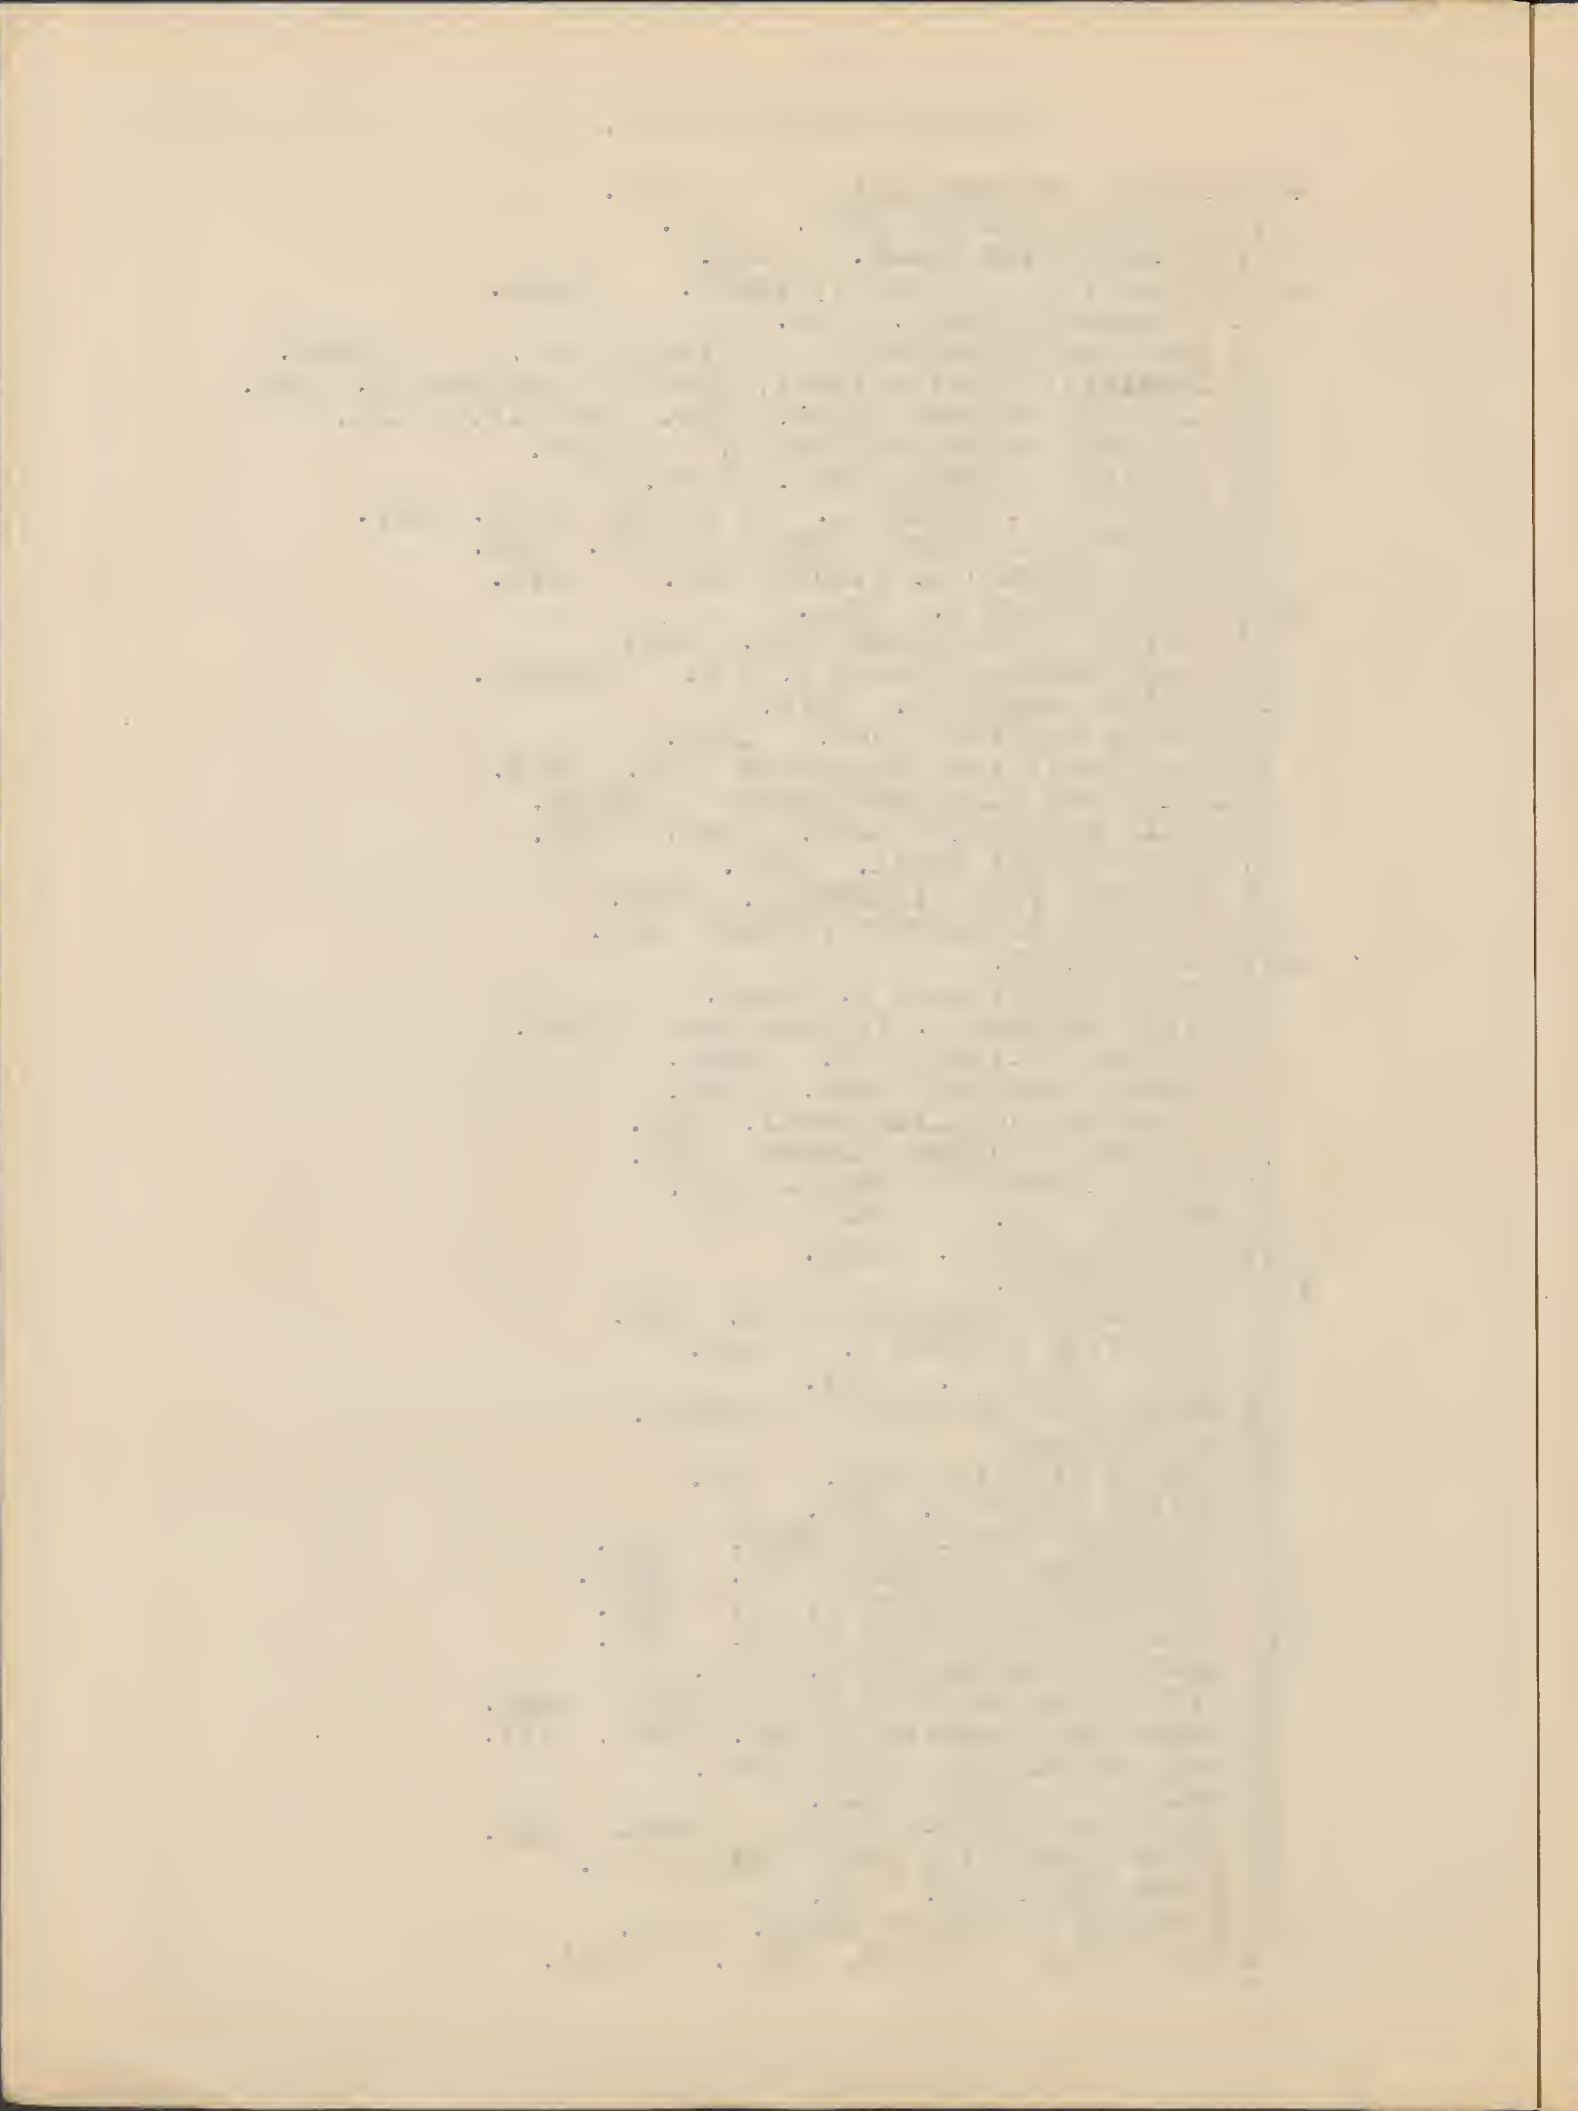

9. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

10. The Department is pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States, and is further pleased to learn that you are desirous of extending the reservation to include the lands now owned by the United States.

Additional determinations,
Hutchinson, Fukien Province.

- ✓ Aster baccharoides Steetz, 5610, 6771, 5832, 5765, 5722 ✓
✓ Aster indica L. 5472 ✓
✓ Artemisia capillaris Thunb. 5153, 5419 I have difficulty in
distinguishing A. scoparia W. & K., and some of those
referred to the latter may belong here.
✓ Chrysanthemum morifolium Ram. 5892, 5890, 5889, 6706 ✓
✓ Ainsliaea fragrans Champ. 5788 ✓
✓ Gnaphalium hypoleucum DC? 5144 ✓ not typical
✓ Blumea glomerata Bl. ? (4567, 7075) very different looking but
probably forms of the same species. One needs in this difficult
genus a large series of good specimens showing the whole plant, not
merely parts, such as tips of branches etc. I cannot build up a good
study series from the fragmentary, poorly selected material you send
as 90 percent of the specimens go into the waste basket as not
showing sufficient characters to warrant putting into the herbarium.
This statement applies to the collections generally, not to specim-
ens in any particular group: were the specimens ample, and showed
the parts one needs for critical study they would be preserved.
✓ Trema sampsoni (Hance) 6947 ✓
✓ Smilax opaca Norton 7174, 7038, 7265 ✓
✓ Smilax china L. var. or forma? 5593, 5525, 5345, 5033, 5101,
6881-6837, 6794, 6671 (no leaves), 7076. What one needs here
is not an enormous series of small specimens all in the same
stage of development, but few, critically prepared, ample
specimens if necessary from marked plants, showing flowers
and fruits, thus indicating at least two different periods
of collection; again one needs both male and female fls.
which may occur on separate plants.
✓ 5042 Lycoris radiata Herb. a cultivated plant. no attention
whatever is given to indicating whether a plant is cultivated
or not. The man who studies a collection is not in a
position to know this.
✓ 7293 Lauraceae, prob. Litsea or Lindera; one can't tell without
male fls. and in this case there are only young buds.
Whenever possible collectors should wait for open fls.
before preparing specimens; this can usually be done when
field work is prosecuted in places near one's base.
✓ Adenophora verticillata Fisch. 5015 ✓
✓ Podocarpus macrophylla Thunb. 8613 ✓
✓ Forsythia sp. 7287 ✓
✓ Osmanthus marginatus Benth. 7269 ✓
✓ Ardisia quinqueгона Bl. 7051 ✓
✓ " crenata A. DC. 7260 ✓
✓ Maesa japonica Mor. var. 6783 ✓
✓ Maesa sinensis A. DC. 7026, 7029; too young, buds only
✓ Dichondra repens Forst. 8672 ✓
✓ Vaccinium carlesii Dunn (prob.) 5743, 8043, 5977, 5815 (but cf.
iteophyllum Hce)
- Thea sasanqua Thunb. ? Why couldn't an open fl. have been secured?
This is probably not an indigenous species, but cultivated
✓ Thea fraterna O. Ktze. 5749, 5783 Here belongs probably most of the
specimens I referred to T. assimilis, in prev. lists.
✓ Thea grijsii (Hance) ? 6767 ✓
✓ Schefflera octophylla Hance. 7303, 7037 ✓
✓ Hedera nepalensis var. sinensis (Tobl.) Rehd. 6765, 6804 ✓
✓ Symplocos caudata Wall ? 5951
- 4567 wrong number

Here is a case where the preparation of material is almost a crime because the rhizomes are generally ignored, and only the upper part of a frond sent, showing not even the stipe. I am not a specialist in ferns and fern allies and can name slowly and only by comparison with named specimens; sometimes I am not at all sure as to the species or even to the genus. Christensen is begging for Chinese material and I cannot send him any because you never make a fern specimen large enough to divide. Christensen has on loan most of the Chinese types and the chance for getting authentic determinations was excellent; now a bit late because the material will be sent back to various herbaria shortly. I have never been able to impress by correspondence the necessity of sending ample study sets!

- *Phyllostachys bambusoides* S. & Z.
- ✓ *Ischaemum ciliare* Retz. 5130 ✓
- ✓ *Pollinia nuda* Trin. 5731 ✓
- ✓ *Pollinia fulva* Benth. 5413 ✓

- ✓ *Cyperus malaccensis* Lam. 5237 ✓
- ✓ *Aleocharis tetraquetra* Nees. 5076 ✓
- *Cyperus teinogyna* Boott.

- ✓ *Ilex purpurea* Hassk. 7232 ✓
 ✓ *Ilex triflora* var. *viridis* Loesen. 6763 ✓
 ✓ *Talinum crassifolium* Willd. 5732 ✓
 ✓ *Euonymus chinensis* Lindl. 5744, 5796 ✓
 ✓ *Casearia subrhombica* Hance ? 5692 ✓ Not satisfied, but the description is short and imperfect. One needs material to send for comparison with the type in the British Museum. Blocked until this can be done
 ✓ *Elaeagnus glabra* Thunb. 7199, 6806, 5836, 5714 ✓
 ✓ *Elaeagnus pungens* Thunb. 5526, 5684, 6932 --- all most unsatisfactory specimens, scraggy, fls too young etc.
 - *Petunia violacea* Lindl. "grassy hillside" as is indicated for very numerous cultivated plants. It would be rather surprising to say the least were all plants so indicated spontaneous.
 ✓ *Eurya japonica* Thb. 8547 ✓
 ✓ *Viola philippica* Cav. 6815, 7124, 5991; one can't be sure in this most critical genus and I would prefer Becker's determination, but in no case in the entire collection is there enough material under a single number so that a division can be made!
Viola sp. 8670, not matched, fls needed
 ✓ *Milstroemia nutans* Champ. 5671 ✓
 ✓ *Fortunella hindsii* Swingle (5810) 7271, 6994 ✓ One really needs local names of these cult and semicult species. I have an idea that Swingle has split too far in recognizing "species" in the kumquat genus, but one again needs complete specimens, complete notes, etc.
 ✓ *Kadsura japonica* Thunb. ? 6795 ✓
 ✓ *Euphorbia splendens* Boj. 6757 ✓ "Wooded hillside" impossible!!!! this is a garden plant, native of Mauritius, and surely not naturalized in China as the note would indicate.
 - *Humulus japonicus* S. & Z.
 - *Juniperus squamata* Lamb. 8063 *not found*
 ✓ *Quercus glabra* Thunb. 5016 ✓
 ✓ *Patrinia scabosiaefolia* Fisch. 7127, 5918, 5941, 5069 ✓ One can't be sure of the specific det in any case, as only the tops of the plants are shown, the lower character leaves absent entirely
 ✓ *Sycopsis dunnii* Hemsl. 8691, 8704, both typical! your 3328, sterile, does not belong here, although probably a *Sycopsis*
 ✓ *Ammannia auriculata* Willd. 5263 ✓
 ✓ *Rosa bracteata* Wendl. 5249 ✓
 ✓ *Stranvaesia benthamiana* Merr. 5813 ✓
 ✓ *Rubus thunbergii* S. & Z. 7117, 7144, 7267 ✓
 ✓ *Rubus* cf. *huii* Diels 5755, you ask about *formosana* and *huii*; I cannot answer the query short of an examination of both types in Europe. Type of *formosana* was from Formosa, of *huii*, from China, Chekiang I believe. Better hold *huii* for the Chinese form at least for the present.
 ✓ *Spiraea thunbergii* var. *fukienensis* Rehd. 7251, 7193, (6789) ✓
 ✓ *Clematis uncinata* Champ. 5014 ✓
 ✓ *Clematis meyeniana* Walp ? 8677 ✓
 - *Polygonum* spp. All my material loaned to the Gray Herbarium; with nothing for comparison I cannot go beyond the genus except in those cases where I recognize a species at sight; your material will be sent away for study as soon as it is mounted.
Selaginella spp. I can do nothing with the material because of the exceedingly critical nature of the group. Hieronymus has split so fine that one cannot make determinations with certainty from the descriptions alone, but comparisons must be made with the types in Europe. In no case have you sent enough material to divide.

Earlier sending

- 1958 by definition is *Cocculus trilobus* DC. ✓ *not listed* ✓
✓1473 ~~Diospyros~~ *Diospyros*; still awaits fls. *still also* ✓
✓1449 probably *Thea fraterna* (Hance)
✓1063 *Athyrium*; basal parts essential, *undoubtedly A. nigripes* Mielle
✓1962 *Dryopteris*, probably *gracilescens*.
✓1055 *Adinandra millettii* Benth. *still also* ✓
1997 *Tylophora*; I still think it undescribed but unfortunately
Schlechter's death blocked me in getting his opinion
and there is no other specialist in this difficult family.

I cannot account for the block of 50 missing numbers you asked about some time ago. Very likely the specimens were received but if so they have gone into the herbarium or into the discard by accident, i.e., before the list of names was prepared, and I have no way of getting at them. If you have other duplicates of the numbers you cannot name to your own satisfaction, please send them along.

Berkeley, Jan. 8, 1928

Dear Mr. "etcalf":

On my return from Los Angeles this morning I found the package of "extras" you sent for further determination. Unfortunately little can be done with the material because in most cases the specimens, both original and second sending, are too fragmentary, young, or sterile. In such cases neither or specialists can do much; and it is bad policy to send sterile or incomplete material to the average specialist who rightly feels that if he volunteer his time and knowledge to make determinations he should really have something worth putting into his herbarium to show for it.

2758 this seems to be the same as the form I am referring to *Glochidion obovatum* Muell.; I may be wrong in this (Incidentally have your assistants begin the generic name at the extreme right of the label; these you have sent are all written in the middle leaving no space for the specific name later)

✓ 2716 too young, even Hitchcock wouldn't attempt anything beyond the genus, as I sent him a bit of the original sending no stock ✓

✓ 2683 ~~is~~ named correctly as far as I know; the flowers should have been given special attention in drying; fruits ~~as~~

2588 ~~the same may~~ needed anyway.

✓ 2563 *Arundinaria japonica* S. & Z. according to Hitchcock; but to be compared with *A. brevipaniculata* Hand.-Maz.

✓ 2555 *Dioscorea collettii* Prain and Burkill, det Burkill.

✓ 2531 *Leucium japonicum* Thb., at least as currently interpreted for the Chinese form; *T. viscidum* Bl. the same?

✓ 2515 not *Glycine*; probably a form of *Galactia tenuiflora* W. & A.

✓ 2508, perhaps form of *Chenopodium album* L. Also 2481 ✓

✓ 2505 not *Viburnum*, but *Callicarpa* sp., perhaps referable to *C. japonica*

- 2497 *Pimbristylis*, too young in Cyperaceae generally one needs mature fruits, not very young buds.

- 2483 *Allium* sp. One of the most critical of genera; there is no specialist and generally I cannot place them beyond the genus.

✓ 2464 sterile; might be either *Equisetum debile* or *E. ramosissimum* Desf. Leave it as the former

- 2463 *Silene* with reasonable certainty, but only very young buds

✓ 2454 fls. needed. is *Rhododendron* but beyond this I cannot go

✓ 2448 see 2758 ✓

✓ 2445 probably a mixture. The second sending is *Ligustrum* sp.!!

✓ 2441 a mixture originally? The second sending is *Photinia* sp.!

- 2429 *Selaginella*, sterile, indet. One needs fully mature and most complete material in this difficult genus. I can only hope for assistance from Berlin where I have enough fertile material to divide and send for comparison with types.

✓ 2427 same as 2716

✓ 2414 is *Crataegus*! sterile One needs fls and fruits. Group of *C. cuneatus*

✓ 2398 more apt to be *Phaius*; one needs flowers in this critical family as there are no characters in the fruits.

THE HISTORY OF THE

REIGN OF

CHARLES THE FIRST

BY

JOHN BURNET

OF THE UNIVERSITY OF OXFORD

IN TWO VOLUMES

LONDON

Printed by J. Sturges, in Strand

1724

By Authority

Printed by J. Sturges, in Strand

1724

- 2386 *Sedum* no leaves no flowers.
- ✓ 2377 is probably *Centranthera humifusa* Wall.
- 2369, will try to get a further det? from Johnston.
- 2352 you suggest Dr. Rose; from such a scrap nobody could with certainty go beyond the genus
- ✓ 2347 *Lipocarpha microcephala* Kth.
- ✓ 2322 *Saccharum spontaneum* Linn.
- ✓ 2261 one of the numerous forms that go under *Eurya japonica* Thb.
- ✓ 2257 *Athyrium* (*Diplazium*); fill tyu Christensen.
- ✓ 2239a *Fimbristylis*, too young
- 2231 is probably correctly named, but is too young
- ✓ 2226b an extreme form of *Panicum indicum* Linn.
- ✓ 2226a *Digitaria chinensis* (Nees)
- 2213 is correct; sterile
- ✓ 2212 is correct as to genus; will try Christensen ^{probably} *A. maximum* Walde
- 2208 is correctly named
- 2200 is correct as to the genus, beyond which I cannot go at present
- 2193 is correct but one needs fruits whenever possible.
- 2190 is correct
- ✓ 2164 *Scleria harlandii* or *hebecarpa*; I am not sure which
- 2011 I think is correct.
- 2009 is probably correct
- 2007 *Selaginella* sp. sterile, indet.

The list of determinations of your material from 11000 above is now being copied and as soon as it is done I will forward it to you.

In future sendings I cannot too strongly emphasize the necessity of supplying ample material so that as I make the determinations I can divide the specimens when necessary to secure the necessary assistance from specialists. Time is my chief lack and probably always will be as long as I hold an administrative position. Fewer numbers, better selection, and more ample specimens, eliminating the poor stuff, will get you much further in the long run. Collections are simply pouring in on me now and I have great difficulty in keeping ahead or even keeping fairly well caught up. As I have stated in former letters I simply cannot handle all groups as to specific determination but must depend on others wherever I can locate anyone who will study and report on material in special groups.

Very truly yours

E.D. Merrill

Additional identifications,
F.P. Metcalf, Fukien Prov.

Polygonum spp.: all my material is on loan at the Gray Herbarium
Your specimens will be sent as soon as they are mounted.

11176, 11427, 11729 same as 1110 not *Rhamnus hupehensis* but *Rhamnus utilis* Decne.

12232, 12266 *Rhamnus leptophyllus* Schneid.

11992 *Calystegia*? or *Ipomoea*?

12433, 12499 *Ipomoea calycina* Clarke

12580, 12403, 12475, 12531 *Merremia hederacea* Hall.f.

12563, 12520 *Datura suaveolens* H. & B. (if fls. are white)

11557 *Hydrocharis morsus-ranae* L.

11549 *Limnanthemum indicum* Thw.

11677 *Celastrus articulatus* Thunb.?

12227 *Lasianthus chinensis* Benth (prob.)

12271 *Hedyotis tenuipes* Hemsl

12385, 12638 *Kochia scoparia* Schrad

12116 *Atriplex tatarica* Linn? fruits needed

11147, 11997 perhaps a form of *Amoranthus gangeticus* Lf

12367, 12493 *Chenopodium album* L? var.; lower character leaves
not collected, only tops of the plants

12260, 12291, 12118 *Thea fraterna* Hance as far as I can tell now

12194 *Ludwigia parviflora* Roxb

11188 *Actinostemma lobatum* Maxim (prob.) no fls.

12838, 12817 both sterile, prob *Casearia subrhombea* Hance

12168 *Acer lanceolatum* Hott

11353 *Ampelopsis brevipedunculata* Koehne (*A. heterophylla*)

12769 *Columella japonica* Merr.

11722 *Elaeocarpus decipiens* Hemsl.

11339 (or 11380?) 12686, 12114 *Silene fortunei* Vis.

12124 *Silene aprica* Tcz.

12105, 12658 *Dianthus chinensis* L.

12695, 11320 *Zanthoxylum bungei* Pl.

11849, 11324 *Peucedanum japonicum* Thb.

11062 *Apium leptophyllum* Huell.

12739, 12738 *Gaillardia aristata* Pursh

11522 *Blumea hieracifolia* DC?

12390 *Blumea mollis* Merr.

11526 *Bidens tripartita* L.

12190 *Aster baccharioides* Steetz?

11818 *Aster hispidus* Thunb

11910 *Aster fordii* Hemsl (or *striatus* Champ?)

12196 *Artemisia apiacea* Hance? too young

11816, 12664, 11369, 12527, 12581 *Wedelia chinensis* (Osborn) Merr.

11834 *Wedelia prostrata* Hemsl?

12637 *Lactuca denticulata* Maxim

11982 *Coreopsis lanceolata* L.

12154, 11086 *Chrysanthemum frutescens* L. (prob.) Your collector
is very careless when he states "wooded hillside" for this cult
and introduced species!

12032 *Antirrhinum majus* L.

11033, 12324 *Clerodendron fragrans* Vent; also your nos. 4527,
2021, 3945, 3237, all reported as *C. foetidum* Bunge I think

11793 *Callicarpa formosana* Rolfe

11414, 12407, 12195, 12050 (this also *Ludwigia parviflora* Roxb
mixed) *Ilysanthes antipoda* (L.) Merr.

 11356 ✓ 11839 ✓ prob *Bromus japonicus* Thb
 11544 ✓ *Hygrophiza aristata* Nees. Genus new to China. Can you
 check on this as native. Label says "in lake water" It
 extends from India to the northern Malay Peninsula and Indo
 China. Is it native in Fukien or introduced and cult for
 ornamental purposes in some private garden ?
 11809 ✓ *Isachne globosa* O.Ktz
 11856 ✓ *Calamagrostis epijegos* Roth
 12002 ✓ *Dryopteris oteroides* O.K. ?
 11931 ✓ 11781 ✓ 12296 ✓ 12599 ✓ 12554 ✓ *Dryopteris sophoroides* O.Ktz, as
 far as I can tell; I have already paid my respects to
 your collector for not securing the stipes and rhizomes !
 Almost invariably they take merely the upper part of
 the frond. There are too many diagnostic characters in
 the stipes and rhizomes to warrant attempting any serious
 work with fragmentary material.
